

EGM-5

Portable CO₂ Gas Analyzer With Optional H₂O and O₂ Measurement

Portable. Accurate. Unprecedented Versatility.

Compact, intuitive, and field-ready, the EGM-5 Portable CO₂ Gas Analyzer delivers precise, reliable measurements—anywhere. Its innovative Auto-Zero technology ensures exceptional long-term stability and accuracy—without the need for recalibration. The versatile EGM-5 works seamlessly with a range of field-ready, plug and play accessories for soil, canopy, and environmental monitoring. With minimal maintenance and effortless operation, it sets a new standard for portable CO₂ measurement performance.

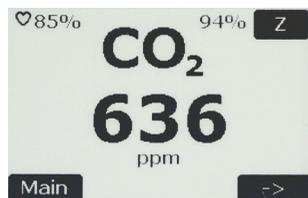

Since 1984, PP Systems has set the standard for precision CO₂ measurement. Built on decades of proven infrared gas analysis expertise, the EGM-5 features a non-dispersive infrared (NDIR) measurement system with advanced microprocessor-based signal processing for unmatched specificity to CO₂. Our innovative Auto-Zero technology provides rapid warm-up, exceptional long-term stability, and sustained calibration integrity. It also eliminates the common issues that compromise data quality—such as span drift, detector aging, and contamination—ensuring every measurement is as precise as the first.

Integral Air Sampling Pump

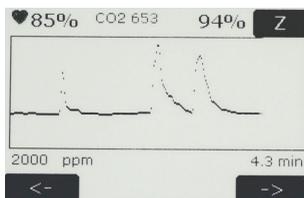

A miniature, long life air sampling pump is included as standard for dynamic gas sampling. The pump can easily be disabled for static measurements.

Touch Display

The EGM-5's large touch display features simple and intuitive system navigation as well as excellent viewing under high sunlight.

Main display for CO₂

Graphical display for monitoring CO₂ history/trends and flux rates

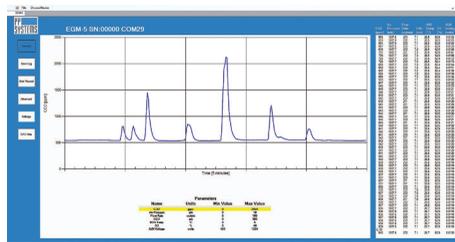

Monitor multiple sensors including CO₂, H₂O and O₂ from one display

Optional WiFi:
Monitor the EGM-5 remotely from your browser in real time.

Software

Our Windows-based **GAS** software package is included for use with the EGM-5 for monitoring, logging and recording environmental sensor data.

Powerful Battery Technology

The EGM-5 includes a powerful rechargeable Li-ion battery for up to 16 hours of field use and an AC power supply for continuous lab operation.

Product Features

- ◆ High precision, compact, non-dispersive infrared gas analyzer for CO₂
- ◆ Accuracy: < 1% over calibrated CO₂ range
- ◆ CO₂ ranges up to 100000 ppm (10%)
- ◆ Automatic pressure & temperature compensation
- ◆ Powerful internal, rechargeable battery providing up to 16 hours of continuous use
- ◆ Numeric & graphical data display in real time
- ◆ Data storage and transfer via USB flash drive
- ◆ Operation from AC or DC power inputs
- ◆ Large touch display with excellent sunlight readability & optimized viewing angle
- ◆ Built-in air sampling pump & electronic flow sensor
- ◆ Voltage & digital output
- ◆ Audible & visual alarms/warnings
- ◆ Wide range of accessories & sensors available
- ◆ WiFi (Optional)

Field-ready plug & play accessories to expand your research capabilities

Soil CO₂ Efflux

SRC-2 Soil Respiration Chamber

PAR

Full-spectrum Quantum Sensor

Soil Temperature

STP-2 Soil Temperature Probe

Soil Moisture & Soil Temperature

Stevens HydraProbe Soil Moisture & Soil Temperature Sensor

Net Canopy CO₂ Flux

CPY-5 Canopy Assimilation Chamber

Temperature/PAR

TRP-3 Temperature & PAR Probe

Static Sampling

Sample Injection Kit

Optional Integrated Options

- ◆ H₂O Sensor
Range: 0-Dewpoint (mb)
Accuracy: < 2% RH
- ◆ O₂ Sensor
Range: 0-100%
Accuracy: ≤ 15 seconds at 23 ± 2°C
Linearity: ± 1.0% of full scale
- ◆ WiFi
Monitor the EGM-5 remotely from your browser in real time.

Technical Specifications

Analysis Method	Non-dispersive infrared, configured as an absolute absorptiometer with microprocessor control of linearization	Terminal Block	10 pin terminal block for system inputs and outputs
CO ₂ Measurement Ranges	0-1000 ppm (μmol mol ⁻¹) 0-2000 ppm (μmol mol ⁻¹) 0-5000 ppm (μmol mol ⁻¹) 0-10000 ppm (μmol mol ⁻¹) <i>Please specify at time of order</i> 0-20000 ppm (μmol mol ⁻¹) 0-30000 ppm (μmol mol ⁻¹) 0-50000 ppm (μmol mol ⁻¹) 0-100000 ppm (μmol mol ⁻¹)	Analog Output	0–2.5V (CO ₂ range selectable)
Pressure Compensation Range	55-115 kPa	Digital Output	USB
Accuracy	< 1% of span concentration over the calibrated range but limited by the accuracy of the calibration mixture	Environmental Sensor Inputs	2 inputs available for use with external chambers and environmental sensors
Linearity	< 1% throughout the range	Alarm	Visual and audible alarm/warnings 2 relay contacts (Alarm1 and Alarm2)
Stability	Auto-Zero at regular intervals corrects for sample cell contamination, source and detector aging and changes in electronics.	Data Storage (USB)	USB Flash Drive port for data storage in multiple formats
Calibration	User-programmable calibration (if required)	Mini USB	For connection to external PC
Warm-up Time	Approximately 15 minutes	Touch Display	2.7" electronic paper touch display with 264 x 176 pixel resolution
Sampling Rate	Sample data is averaged and output every 1.0 seconds. (1 Hz)	Power	Internal, rechargeable 7.4V, 8.7 Ah Li-Ion battery provides up to 16 hours of continuous use. Battery life will be reduced if used with external accessories/sensors.
Sampling Pump	Integral air sampling pump Pump can be programmed for both dynamic and static sampling.	Power Consumption	Warm up: 12W (12V @ 1.0A) Normal operation: 6W (12V @ 0.5A)
Gas Flow Rate	200-500 cc/min (280-340 cc/min is optimal) An internal electronic flow sensor monitors flow rate.	Enclosure	Rugged, ergonomic, lightweight aluminum with polyurethane base
		Gas Connections	Two quick connect fittings (inlet and exhaust) for use with 1/8" (.125") ID tubing
		Operating Temperature	0–50°C, non-condensing External filtration is recommended in dirty/dusty environments.
		Dimensions	20 cm (L) x 20 cm (H) 10 cm (W) (Enclosure only)
		Weight	1.5 kg
